Professional Summary

Full Stack Developer with **4 years of experience in React.js and 2+ years in Node.js**, specializing in scalable web applications and enterprise solutions. Currently managing and supporting **7+ live auction platforms**, delivering performance optimizations, real-time features, and business-critical enhancements. Recognized as Best Employee of the Year for technical ownership, mentoring developers, and consistently delivering high-quality solutions.

Career Highlights

- Awarded **Best Employee of the Year** at Liquidity Services.
 - Manage and support **7+ live auction platforms**, delivering feature enhancements, production support, and performance improvements.
 - Improved application performance by **30%** through frontend optimization techniques.
 - Mentored and trained **2 developers** on implementation and best practices.
 - Integrated secure payment gateways including **Merchant Warrior** and **HyperPay**.
 - Developed real-time auction systems using **WebSockets**.
 - Take ownership of critical features from requirement analysis through production deployment and support.
-

Professional Experience

Full Stack Developer

Liquidity Services (Acquired AxionBots Software in February 2025) March 2024 – Present

Projects: [Minnesota State Government Auction Platform & Website](#)

Key Roles & Responsibilities:

- Developed and maintained scalable full-stack applications using React.js, Node.js, and Express.js.
- Designed and optimized RESTful APIs to support high-traffic applications and real-time business workflows.
- Enhanced application performance by implementing lazy loading, React Suspense, code splitting, and rendering optimizations.
- Improved frontend efficiency using debouncing, throttling, useMemo, and useCallback.
- Implemented JWT-based authentication and secure request handling mechanisms.
- Developed real-time auction functionality using WebSockets for live bidding and instant updates.
- Integrated Merchant Warrior and HyperPay payment gateways with secure backend validation.

- Built a centralized Control Hub Dashboard for managing website configurations and payment workflows.
- Participated in sprint planning, requirement analysis, story estimation, and technical discussions.
- Took ownership of feature development from requirement analysis through production deployment and support.

React Developer

Leora Infotech Private Limited

June 2022 – March 2024

Projects: [INTRVU SPACE | Hiring Application \(AI\)](#) / [Klockmate | HRMS Platform](#)

Key Roles & Responsibilities:

- Developed reusable and scalable UI components using React.js.
 - Implemented application state management using Redux and Redux Saga.
 - Built reusable custom hooks to improve maintainability and reduce code duplication.
 - Refactored complex UI components into modular and scalable architectures.
 - Integrated REST APIs and collaborated closely with backend teams.
 - Participated in Agile ceremonies including sprint planning, stand-ups, reviews, and retrospectives.
 - Delivered multiple production-ready features for AI recruitment and HRMS platforms.
-

Technical Skills

Frontend: React.js, Next.js, Redux, Redux Toolkit, Redux Saga, Micro Frontend Architecture, React Router DOM

Backend: Node.js, Express.js

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3

Database: MySQL

APIs & Authentication: REST APIs, JWT, WebSockets

Tools: Material UI, Bootstrap, Formik, Yup, Axios, Vite, Webpack, Git, GitHub, GitLab

Certifications:

[Complete Web Application Hacking & Penetration Testing – Udemy \(2025\)](#)

[Claude Code Fundamentals Certification](#)

[AI-Powered Development: GitHub Copilot in Visual Studio Code](#)

Education :

B.Com (General) – Sri Devi Arts and Science College, Ponneri (2019–2022)
